To Whom it may concern

Re: The DigiWx Automated Weather Observation System (AWOS)

This is to confirm that we the operators of the Harold Charles International Airport (MBAC) have been using the DigiWx system since our inception in May 2008 as the primary source of weather observation system.

It can be viewed online at <http://www.digiwx-ambergriscayairport.com/> which is a great tool for our flight crews as well as via the Air to Ground selection.

During the period we have been operated the system reliability has been good with some minor sensor issues related to the rather harsh environment that we operate in however these are easily overcome by the factory trained personnel we have at the field.

Sincerely

Roger K Murphy
MBAC Aerodrome Manager
