

THE STANDARD OF MEASUREMENT

Client Testimonials

“As a corporate helicopter operator, the safe execution of our flights is paramount. We added the Belfort DigiWx II AWOS to our headquarters helipad to increase our flight safety. The three ways of obtaining the weather information, via radio, Internet, and phone, aids our pilots and dispatch operators in obtaining up to the minute observations. We now have the advantage of making timely and accurate “go, no-go” weather decisions. The DigiWx II has been operating flawlessly since its installation last year.”

Joe Filasky

Chief Pilot Rotary Wing
CSC Transport

“Our business is designing GPS approaches for Heliports and Airports. When the approach calls for a FAA approved AWOS to lower the minimums, we turn to the Belfort DigiWx II AWOS. We’ve been recommending the DigiWx II to our clients for more than five years. We find the DigiWx II ideal for helicopter operations and so do our customers.”
