Re: DigiWx Sandia – Sandia Airpark, NM

Dear Sirs:

I wanted to let you know how beneficial your system has been since being installed at Sandia Airpark (1N1) in Edgewood, NM. As a pilot living in New Mexico where the saying is “Wait 10 minutes and the weather will change...” your system allows pilots to check the weather conditions from any laptop anytime. This is most helpful to our residents who commute to Los Alamos and other locations through out New Mexico.

Additional, as a realtor for the Airpark clients are able to view the wind and weather conditions. Plus, with the live web cam I am always getting calls when they see someone at our gas pumps. Your system is one that I would recommend to other locations where a runway is located.

Sincerely,

Teri Gordon
Pilot and Real Estate Broker
